

Kanokwan Meekaew

Senior Frontend Developer & Business Analyst

BORN : April 22, 1996

About me

PROFESSIONAL PATH

I am a **Senior Frontend Developer** specializing in building high-performance, dynamic web applications with **Next.js, React, and TypeScript**. What sets me apart is my comprehensive background in **Business Analysis (BA), System Analysis, Project Management, and Scrum leadership**. This multi-disciplinary expertise allows me to bridge the gap between complex technical execution and high-level business strategy seamlessly.

I excel at designing scalable front-end architectures, optimizing performance (Core Web Vitals), and mentoring development teams. Beyond writing clean, maintainable code, I deeply understand business requirements, effectively manage project timelines, and foster Agile collaboration to ensure end-to-end product success.

I am always eager to embrace emerging technologies, tackle new business challenges, and drive continuous growth.

Technical Skills

Management & Analysis Skills

- ▶ **Project Management & Agile:** Scrum Master, Agile Methodologies, Resource Allocation, Sprint Planning.
- ▶ **Business & System Analysis:** Requirement Gathering (BRDs, User Stories), Stakeholder Management, System Design.
- ▶ **Quality Assurance:** User Acceptance Testing (UAT) Strategy, Test Scenario Design, Defect Tracking.
- ▶ **Technical Leadership:** Code Review, Mentorship, Tech Stack Selection, System Architecture Planning.

Objective

I am a driven professional seeking new challenges to continuously enhance my technical expertise and leadership capabilities. My ultimate goal is to become a highly effective Project Manager who seamlessly bridges the gap between business objectives and technological execution.

Personality

Friendly

Optimistic

Energetic

Hard working

Motto

"You can't get everything you want at the same time, but you can always do something today to get one step closer to your goals."

Language

Thai

English

Education

ACADEMIC CAREER

BACHELOR DEGREE

BACHELOR OF SCIENCE PROGRAM IN SOFTWARE ENGINEERING

GRADUATED IN MAY 2018

HACKATHON AND STARTUP CAMP

WALAILAK UNIVERSITY

FEB 2018

PROJECT TO GRADUATE IN BACHELOR DEGREE

PRONTO TOOLS

NOV 2017 - MAY 2018

Develop both the front-end and the back-end that are part of the database. Use React and Redux, I wrote API with Node.js and Express and I used relational databases is MySQL and Graph Databases is Neo4j.

DEVELOP WEB APPLICATION CAMP

WALAILAK UNIVERSITY

MAR 2017

TESTER JUNIOR INTERN

G-ABLE Co., Ltd. (Work at the job site MIMO Tech Co., Ltd.)

JUN - OCT 2017

Information Technology Professional Examination Council

JUNE 2016

I passed the Information Technology Professional Examination Council (ITPEC) in the level Information Technology Passport Examination (IP)

SOFTWARE TESTING CAMP

WALAILAK UNIVERSITY

JUNE 2016

Tool help software testing with Python language and Robot Framework.

SCUM MASTER AND DEVELOP CAMP

WALAILAK UNIVERSITY

JUNE 2015

Work Experience

PREVIOUS JOBS

SENIOR FRONTEND DEVELOPER & BUSINESS ANALYST

7 SOLUTIONS

April 2024 - Present

As a Senior Frontend Developer & Business Analyst, I spearhead technical architecture strategies while **actively developing high-performance applications using Next.js, React, and TypeScript**. Beyond my core development role, I actively fulfill Business Analyst (BA) and lead responsibilities to ensure end-to-end project success. My expanded responsibilities include:

- ▷ Participating in requirements gathering with stakeholders.
- ▷ Brainstorming with Product Owners (PO) and UX/UI designers to design robust systems.
- ▷ Reviewing UX/UI designs for technical feasibility and user experience.
- ▷ Leading backlog grooming sessions for the development team.
- ▷ Developing and implementing system features according to my technical role.
- ▷ Conducting code and system reviews for the development team.
- ▷ Conducting system demonstrations (Demo) for stakeholders.
- ▷ Providing system usage training to stakeholders.

Technically, I specialize in selecting optimal Tech Stacks, designing scalable state management solutions (Zustand), and defining coding standards. I handle complex technical challenges, from advanced UI/UX implementations to deep-dive debugging for performance optimization (Core Web Vitals). Additionally, I mentor junior developers and collaborate closely with backend engineers to define API contracts.

SYSTEM ANALYST

CP ORIGIN

October 2021 - April 2024

As a System Analyst, I played a multifaceted role, simultaneously acting as a Business Analyst, Project Manager, and Scrum Master. I was responsible for bridging the gap between business objectives and technical execution to ensure the seamless delivery of high-quality software solutions. My key responsibilities included:

- ▷ **Requirement Engineering:** Gathering and analyzing complex business requirements to craft comprehensive Business Requirement Documents (BRDs) and actionable User Stories.
- ▷ **Stakeholder Management:** Acting as the primary liaison between technical teams and business stakeholders to clarify requirements, align expectations, and ensure seamless communication.
- ▷ **Agile Leadership:** Facilitating Agile/Scrum methodologies, overseeing project timelines, allocating resources, and driving cross-functional team collaboration.
- ▷ **Quality Assurance (UAT):** Proactively leading User Acceptance Testing (UAT) by designing robust test scenarios and verifying business conditions for successful product launches.

By effectively managing the end-to-end software development lifecycle, I successfully fostered a collaborative environment that accelerated product delivery and met strategic business goals.

SOFTWARE ENGINEER

ROBOWEALTH

October 2019 - October 2021

As a Software Engineer specializing in Front-end development, I focused on building dynamic and highly interactive user interfaces. My core responsibilities included:

- ▷ **Modern Web Development:** Utilizing React and Redux to engineer scalable single-page applications (SPAs) with complex state management.
- ▷ **Responsive UI/UX:** Writing clean, maintainable code using HTML5, CSS3, and JavaScript (including jQuery) to ensure pixel-perfect, responsive designs.
- ▷ **Cross-Platform Compatibility:** Developing web applications optimized for seamless performance across various browsers and mobile platforms.

By emphasizing code quality and modern frontend frameworks, I significantly improved application performance and overall user experience.

REACT DEVELOPER (Web Application)

SOFTVERK

July 2019 - October 2019

As a React Developer, I was dedicated to crafting intuitive and responsive front-end experiences for web applications. My key contributions included:

- ▷ **Component-Based Architecture:** Leveraging React and JavaScript to build reusable UI components and interactive front-end systems.
- ▷ **Full-Stack Integration:** Integrating front-end interfaces with PHP backends, alongside jQuery, HTML, and CSS implementations.
- ▷ **Device Compatibility:** Ensuring all interfaces were highly responsive and provided a consistent, user-friendly experience across multiple devices.

JUNIOR FULL STACK DEVELOPER (Web Application)

3DS INTERACTIVE

July 2018 - June 2019

In my role as a Junior Full Stack Developer, I managed end-to-end web application development, taking ownership of both client-side and server-side implementations. My key tasks included:

- ▷ **End-to-End Development:** Building dynamic, responsive front-end interfaces utilizing HTML, CSS, JavaScript, and jQuery.
- ▷ **Backend & API Engineering:** Designing and implementing robust RESTful APIs using PHP to serve data efficiently to the client side.
- ▷ **Database Management:** Constructing and optimizing database queries to guarantee high availability and robust application performance.

FRONT END DEVELOPER

ORISMA

May 2018 - July 2018

Started my career as a Web Application Developer, building a strong foundation in modern web technologies with a primary focus on Front-end development. My responsibilities included:

- ▷ **Interface Development:** Creating visually appealing and highly responsive web applications utilizing HTML, CSS, JavaScript, and jQuery.
- ▷ **Platform Consistency:** Delivering consistent user experiences across multiple browsers and platforms.
- ▷ **Backend Collaboration:** Working with PHP backends to wire up interfaces and ensure functional integrations.
